

DigiTec offers the most complete, customized and Versatile line of Digital Controllers in the industry. Reliability is the most important single factor in choosing a digital controller, and DigiTec's reputation has been built on exactly that. Our products play an integral role in industrial applications including packaging, level flow, weighing, and pumping applications.

Tachometers on the WESTCON line are rugged built to convert rotary speed to a linear output voltage. Tachometers are used widely for aviation, marine, mining, oil and gas production plus other demanding applications.
